

RETURN POLICY

THE STRATEGIST

LAST UPDATED: 2026

STATUS: OPERATIONAL MANDATE

1

THE NATURE OF THE ACQUISITION

You are not purchasing a commodity; you are acquiring access to High-Leverage Frameworks. Because the value is transferred the moment the data is accessed, all transactions are final.

2

THE COMPETENCE MANDATE

Claims that the system "did not work" are categorized as Execution Failures.

The Fact:

Our Operational Keys are precise. If the yield was not achieved, the flaw lies in the Operator's implementation, timing, or resolve.

The Result:

We do not refund for a lack of competence.

3

ACCESS REVOCATION

THE STRATEGIST reserves the right to terminate access immediately—without refund—if the Operator:

Compromises the Edge:

Leaking internal frameworks to outsiders.

Taints the Network:

Bringing low-energy "corporate" complaints into the community.

Financial Sabotage:

Attempting chargebacks via banking institutions.

4

THE ELITE EXCEPTION

Refunds are not a right; they are a rarity.

An exception may be granted only if THE STRATEGIST determines that the Operator is fundamentally incompatible with the system and it is in our interest to remove them.

5

FINALITY

The value of this system is found in the Take, not the transaction. If you are looking for a "guarantee," you are still thinking like a customer. Think like an Operator.

6

FINAL WORD

Whop handles the payment. THE STRATEGIST handles the transformation. Accept the observation, or exit the system.

SIGNATURE: ELECTRONICALLY BINDING UPON ACCESS
